1) What is HTML?

HTML stands for Hyper Text Markup Language. It is a language of World Wide Web. It is a standard text formatting language which is used to create and display pages on the Web. It makes the text more interactive and dynamic. It can turn text into images, tables, links.

2) What are Tags?

HTML tags are composed of three things: an opening tag, content and ending tag. Some tags are unclosed tags.

Note: HTML documents contain two things:

- a). content
- b).tags

>>> Content is placed between tags to display data on the web page.

<tag> content </tag>

3) Types of heading does an HTML contain?

The HTML contains six types of headings which are defined with the <h1> to <h6> tags. Each type of heading tag displays different text size from another. So, <h1> is the largest heading tag and <h6> is the smallest one.

Eg: **<h1>Rajesh Kumar </h1>**

<h2> Rajesh Kumar </h2>

<h3> Rajesh Kumar </h3>

<h4> Rajesh Kumar </h4>

<h5> Rajesh Kumar </h5>

<h6> Rajesh Kumar </h6>

4) The difference between HTML elements and tags?

HTML elements communicate to the browser to render text. When the elements are enclosed by brackets <>, they form HTML tags. Most of the time, tags come in a pair and surround content.

5) What is a marquee?

Marquee is used to put the scrolling text on a web page. It scrolls the image or text up, down, left or right automatically. You should put the text which you want to scroll within the <marquee>.....</marquee> tag.

6) How to make a picture of a background image of a web page?

To make a picture a background image on a web page, you should put the following tag code after the </head> tag.

```
<body background = "image.gif">
```

7) What are empty elements?

HTML elements with no content are called empty elements. For example:
, <hr> etc.

8) What is the use of a span tag?

The span tag is used for following things:

>>For adding color on text

>>For adding background on text

>>Highlight any color text

Eg:

```
<p>
```

```
<span style="color:#ffffff;">
```

In this page we use span.

```
</span>
```

```
</p>
```

10) What is the use of an iframe tag?

An iframe is used to display a web page within a web page.

Syntax:

```
<iframe src="URL"></iframe>
```

Example:

```
<iframe src="demo_iframe.html" width="200px" height="200px"></iframe>
```

Eg with link:

```
<iframe src="https://www.linkedin.com/in/therjrajesh/" name="iframe_a"></iframe>
```
