HTML INTERVIEW QUESTIONS

@the-programming-girl

① What is HTML?
→ HTML stands for Hyper Text Markup Language. It is a language of World wide web. It is a standard text formatting language which is used to create and display pages on the web. It makes the text more interactive and dynamic.

② What is formatting in HTML?
→ The HTML formatting is a process of format the text for a better look and feel. It uses diffrent tags to make text bold, italicized, underlined.

③ What are HTML Tags.
→ We use HTML tags for placing the elements in the proper and appropriate format. Tags use the symbols < and > to set them apart from the HTML content.
The HTML tags need not be closed always

③ Define multipart from data?

→ Multipart form data is one of the values of the enctype attribute. It is used to send the file data to the server side for processing. The other valid values of the enctype attribute are text/plain and applicable x-www-urlencoded.

4) Describe HTML Layout Structure?

→ Every webpage has diffrent components to display the intended content and specific UI. But still there are few things which are templated and are globally accepted way to structure the web page.

<header> Stores the starting information about the web page.

<footer> :- Represents the last section of the page.

<nav> :- The navigation menue html page

<article> :- It is a set of information.

<section> :- It is used inside the article block to define the basic structure of page.

<aside> :- Sidebar content of the page.

5) What are attributes in HTML?

→ An additional attribute is given to each tag to alter the behaviour of the tag. Attributes are defined directly after the tag name, inside the angular brackets. They appear in opening tags and can never appear closing tags.

for example.

You can define an attribute for <input> tag such as text field, checkbox, radio button.

6] What is an Anchor tag in HTML?
An anchor tag is used to link 2 sections, web pages, or website template in HTML

where href is an·attribute of the anchor tag used to identify the sections in document the link is defined in target attribute, which is to be linked.

7] What are Lists in HTML ?
→ HTML list are used to group a set of related items in lists. It is defined with an <li> tag.
Some commonly used <HTML>
• Ordered List
• Unorderd List
• Description List <dl>
• Menu list <menu>
• Directory List <dir>

8] What is an Image Map?
An image map lets you link diffrent web-pages with a single image. It is represent with the <map> tag. Every Employer expect the applicant to know about this. and this has been one of the most asked question.
